EXPERIENCE

Operations Manager — TechMasterAI.org, Remote

Jan 2026 – Present

Early-Stage Tech Startup

- Orchestrated sprint cycles across engineering and product in direct coordination with the CEO, MD, and CMO, compressing milestone delays by ~30% and aligning three workstreams for the on-schedule **Version 1.0 platform launch**.
- Directed the end-to-end rollout of the live **Beta DSA Practice Dashboard** — from QA sign-offs through deployment — and deployed a lightweight OKR tracker that increased team output by **25%** within the first quarter.

PROJECTS

Trinethra — AI Supervisor Feedback Analyzer

React, Vite, Node.js, Ollama, LLM

- Engineered an on-device LLM pipeline via **Ollama**, eliminating cloud-API dependency and reducing feedback processing time by **45%** while ensuring data privacy.
- Architected a real-time transcript ingestion system integrated with a **React/Vite** dashboard, enabling supervisors to extract structured AI insights **3× faster** than manual review.

BDA Team Management Module

MERN Stack, JWT, MongoDB, Express.js, REST API

- Designed a full-stack **MERN** platform consolidating four manual workflows — lead tracking, sales dashboards, client comms, and team management — under a unified role-based **JWT**-authenticated interface.
- Optimised **React** component architecture and **MongoDB** query indexing, achieving a **1.4s** reduction in dashboard load time for a 20-person sales team.

Frontend UI — Hackathon, IIIT Janakpuri

React, HTML/CSS, Figma

- Executed end-to-end UI development as sole frontend engineer — Figma wireframes to responsive production build across mobile and desktop in under 24 hours.
- Implemented memoization and lazy loading, cutting unnecessary re-renders by **38%**; performance was specifically recognised by the evaluation jury.

ML Nutrient & Water Uptake Analysis — Hydroponics

Python, Scikit-learn, Pandas

- Developed regression and classification pipelines to predict soybean growth from pH, nutrient, and water sensor data; achieved **89% validation accuracy** and reduced feature-extraction time by **50%** across 5+ heterogeneous sensors.

Lung Cancer Detection via Deep Learning

Python, TensorFlow, CNN, Keras

- Implemented a **CNN** classifier in **TensorFlow / Keras** with data augmentation and dropout regularisation; attained **92% accuracy** (F1: 0.91) and a train-to-validation gap under **3%**, outperforming the baseline by 8 points.

NLP Text Embeddings Pipeline

Python, Vertex AI, Google Cloud, Vector Search

- Deployed semantic similarity and vector search pipelines on **Google Vertex AI**; optimised batch embedding calls to cut query latency by **35%** over a TF-IDF baseline.

TECHNICAL SKILLS

Languages	C++, Java, Python, SQL
Web Development	React.js, Node.js, Express.js, HTML/CSS, REST APIs, JWT, MERN Stack, Vite, MongoDB
AI / ML	TensorFlow, Scikit-learn, CNNs, NLP, Text Embeddings, Vertex AI, Deep Learning
Cloud & Tools	Google Cloud Platform, Git/GitHub, Figma, DSA, OOP

ACHIEVEMENTS

- NextGen Hackathon** — Advanced to Final Jury Round; selected to present a full-stack technical solution to a panel of industry professionals.
- SEBI Securities Market Competition** — Finalist; recognised for a data-driven quantitative analysis of securities market trends.
- National Hackathons** (Adobe India, Solvit VIT, Summer of CodeFest, IIIT Janakpuri) — Finalist across four national-level events; consistently recognised for frontend execution and system design. Finance & Sponsorship lead at **TEDx VIT Bhopal**: grew partner count by **20%** for a 500+ attendee event.

EDUCATION

VIT Bhopal University — B.Tech, Computer Science & Engineering	2024 – 2028
Gurukul The School, Ghaziabad — Class XII	2024 95%
Modern Vidya Niketan 17, Faridabad — Class X	2022 97%

Certifications: NLP Text Embeddings (Google / Vertex AI) • Prompt Design in Vertex AI • SE Job Simulation: Kafka, H2, REST API (Forage).
